## Career Profil

Anastasia Hraneko works as a Senior Consultant at Deloitte Consulting GmbH in Vienna. Her focus is on the functional and technical implementation of financial consolidation solutions using Enterprise Performance Management (EPM) systems, primarily within SAP, tailored for reporting, financial consolidation, and financial modeling. In client projects, she is responsible for optimizing consolidation processes and group reporting. With extensive experience in this field, she excels at addressing complex professional challenges through technology-driven implementations and delivering comprehensive client support.

## Academic Background

- MA in Finance Strategy and Business Analytics – Lauder Business School, Vienna

## Relevant Project Experience

### **Design and implementation of group consolidation**

Operational responsibility for the design, implementation, and further development of group consolidation in SAP S4/HANA Group Reporting and SEM-BCS with various focuses, including IFRS and HGB compliance

### **Project management, including development and support of EPM systems**

Experience in managing software development projects and improving the entire consolidation process during implementations. Introduction and support of various EPM systems for financial consolidation (SAP GR, SEM-BCS, HFM)

### **Planning solutions for various industries and business areas**

Development and design of financial models for financial planning and forecasting, ensuring compliance and data integrity (Anaplan)
